

A full service from site survey to design, manufacture and installation

Professional safety signs survey: an Anderco safety signs professional with a wealth of legislative and industry experience, will survey your facility, assess your current signage programme and prepare a comprehensive report outlining corrective actions and a complete list of required and recommended signage products. A site survey will be carried out at your request and at a time convenient to you.

Fast, easy and cost effective: Anderco will provide expert assistance in the management of your company's safety signage project saving you time and resources on industry standard research, internal data collection and project management.

Deliverables:

- Comprehensive survey report providing a full assessment and list of recommendations.
- A professional design service and custom made signs.
- Prioritised corrective action steps with a complete list of signs to improve facility safety.
- Guaranteed compliance with current safety signage regulations.
- Improvements in communications by putting critical information at the point of need.
- Elimination of unsafe conditions.
- Ongoing updates on safety signs legislation and guidelines.

Areas of Assessment:

- General safety signage.
- Personal protective equipment (PPE) notices.
- Exit marking and emergency egress requirements.
- Confined space warnings.
- Fire protection equipment identification.
- Safety shower and eyewash identification.
- Tank and vessel signage and placards.
- Traffic management signage.

Quality Assurance

As an ISO 9001:2008 registered company, Anderco operates to the highest standards of quality and has a comprehensive set of operational procedures covering the effective delivery of products and services to our customers.
